Infocomm 2019 Recap

Learn about all of the new products and eye-catching builds we had on display during our time attending Infomm 2019 in Orlando, FL.

Below is a recap of all the goodies we had on display in booth 1721 at the Infocomm show in Orlando, FL. This year, we were able to display several new products fresh off the assembly floor that are great solutions for integrators, architects and end users alike.

In our booth, we presented several lectern styles, each of which fit an array of different needs. First off is our LekTek style, a hybrid of our custom and economy line of furniture. This lectern comes in one size for ease of ordering with several pre-configured options, such as height adjust, a slanted work surface, hinged access doors and cable management. Lending to its custom nature, it is available in any of our standard and premium wood veneers, any commercially available plastic laminate or can be custom color matched. In addition, add-ons, such as rack, presenter locking doors or surface cut outs, can be added as needed.

Another new lectern style on display this year was our ELCO™-ADA36. This unit is a part of our Quick Ship line, meaning it is easy to specify due to its pre-configured nature, is cost-effective and meets project deadlines due to its 30 day time line for build. As a standard, it comes in one size in any of our regular and textured melamine colors and includes height adjust to allow sit-to-stand capabilities and our ADA pullout work surface for wheelchair accessibility. Also included are presenter locking doors, an adjustable height shelf, locking service panel and casters. Rack, lighting, surface cut outs and an array of other options can be specified.

Every year, we like to showcase our customization abilities by putting several elaborate designs on display. This year, in the lectern category, we did that with our MLP-35 Prairie Style featuring live edge Walnut panels, our MLT-30 Traditional Style with an etched tree branch panel over an illuminated LED backing, and an MELC-33 Ellipse Style in quartered White Ash veneer with chevron pattern.

Our ARCO™ series is another style that we featured in the form of a lectern and credenza. The ARCO™ style consists of architectural paneling on top of a Slate Gray or Black melamine body. To fit the esthetics of the space, panels are available in any of our standard or premium wood veneers, any commercially available plastic laminate, any regular or textured melamine color or in any commercially available paint grade. This series features pre-engineered interior configurations featuring a combination of keyboard shelf, rack or a shelf. Standard features include a presenter locking doors, service panel, casters and ventilation. Add-ons include fans, grommets, surface cut outs, drop leaf shelves and door upgrades with vent or glass inlay, to name a few.

To round off the diversity of our booth, we included a handful of well known products, such as our PLC-50L display lift cabinet, ELCO™-25 lectern, MCMC-32 stage monitor cabinet and ELCO™-RL60 height adjust desk, to name a few. Check out an overview of our booth in the video below.
